ABOUT US

DAAN AUTO PARTS Co., Ltd. was founded in 2017 by Mr. Chien. On May 14, 2024, we established our sales office in Osaka, Japan, and later that year, on December 9, we relocated our Taipei office from Da'an District to Banqiao District in New Taipei City.

Since our inception, we have built a reputation for integrity by providing only brand-new, genuine products sourced directly from original manufacturers. As an authorized distributor of leading global brands, we are committed to upholding the values of respect, honesty, and responsibility in everything we do.

At the same time, we believe in giving back to society and creating a better workplace for our team members—whom we regard as the cornerstone of our company. Our mission is to grow together with our people, and this shared growth is the vision that guides our future. In addition to being an authorized distributor in Taiwan, we are also a professional manufacturer of window regulators, motors, and mechanical control cables, with over 30 years of industry experience.
